TTUHSC EL PASO VPN Setup for Windows 10

1. Right click **START** and select **Control Panel**.

2. In the Control Panel, verify **View By** is set to **Category**. Click on **Network and Internet**.
3. Click on the **Network and Sharing Center**.

4. Select **Setup a New Connection or Network**.
5. Select **Connect to a Work Place** and press **Next**.

6. If you receive the following prompt “**Do you want to use a connection that you already have?**” select “**No, create a new connection**” and click **Next**. If you don’t get this prompt skip to the next step.
7. On “How do you want to connect?” click on Use my Internet Connection.

- Connect to a Workplace

**How do you want to connect?**

- **Use my Internet connection (VPN)**
  Connect using a virtual private network (VPN) connection through the Internet.

- **Dial directly**
  Connect directly to a phone number without going through the Internet.
8. In the **Internet address** field type `svpn.elpaso.ttuhscl.edu` and in the **Destination name** field type **TTUHSC VPN**. Checkmark “Don’t connect now; just set it up so I can connect later” and click on the **Next** button.
9. In the **User Name** field input your **eRaider** and in the **Password** field, type your **eRaider password**. Checkmark “Remember this password.” In the **Domain** field, type **TTUHSC** and click on **Create**.

10. Do not connect to the work at the moment. Click on **Close**.
11. From the previous screen, click on **Change adapter settings**.

12. Right click on **TTUHSC VPN** and select **Properties**.
13. Select the **Security** tab. In the **Type of VPN** drop menu select **Layer 2 tunneling protocol with IPsec (L2TP/IPsec)**. **Data encryption** should be set to **Require encryption (disconnect if server declines)**. Select **Allow these protocols**, checkmark **Challenge Handshake Authentication Protocol (CHAP)** and **Microsoft CHAP Version 2 (MS-CHAP v2)** then click on the **Advance settings** button.

14. Select **Use preshared key for authentication**. In the **Key** field, type `ttuhsc` then click **OK**. Next the **TTUHSC VPN Properties** window will reappear. Click **OK** to save the changes you made.
15. To connect to the TTUHSC network via VPN, click on the network button in the notification area (lower right corner) to access the network side bar.

Or

The network bar will appear. Click on TTUHSC VPN.
16. Select **TTUHSC VPN** from this window and press **Connect** to authenticate to the VPN network.

17. After you are finished using the TTUHSC VPN, make sure to disconnect from it. To disconnect, click on the **Network** button in the notification area (lower right corner) to access the network side bar.
Next the network side bar will appear. Click on **TTUHSC VPN**.
18. Then, once again, click on **TTUHSC VPN** and select **Disconnect**.
