TTUHSC EL PASO VPN Setup for Windows 7

1. Click START and select Control Panel.

2. In the Control Panel, verify View By is set to Category. Click on Network and Internet.
3. Click on the **Network and Sharing Center**.

4. Select **Setup a New Connection or Network**.
5. Select **Connect to a Work Place** and press **Next**.

6. If you receive the following prompt “**Do you want to use a connection that you already have?**” select “**No, create a new connection**” and click **Next**. If you don’t get this prompt skip to the next step.
7. Under “How do you want to connect?” click on Use my Internet Connection.

8. In the Internet address field, type svpn.elpaso.ttuhscedu and in the Destination name field, type TTUHSC VPN. Place a checkmark on “Don’t connect now; just set it up so I can connect later” and click on the Next button.
9. In the User Name field, input your Eraider and in the Password field, type your Eraider password. Checkmark “Remember this password.” In the Domain field, type TTUHSC and click on Create.

10. Do not connect to the work at the moment. Click on Close.
11. In the notification area (Lower right area) click on the **Network Button**.

12. Right Click on the **TTUHSC VPN** and select **Properties**.
13. Select the Security tab. In the Type of VPN drop menu, select Layer 2 tunneling protocol with IPsec (L2TP/IPsec). Data encryption should be set to Require encryption (disconnect if server declines). Select Allow these protocols, checkmark Challenge Handshake Authentication Protocol (CHAP) and Microsoft CHAP Version 2 (MS-CHAP v2) then click on the Advance settings button.
14. Select Use preshared key for authentication. In the Key field, type ttuhsc then click OK. Next the TTUHSC VPN Properties window will reappear, click OK to save the changes you made.
15. To connect to the TTUHSC network via VPN, click on the **network button** in the notification area (lower right corner) to access the network side bar.  

Or  

The network bar will appear. Click on **TTUHSC VPN** and next click on the **Connect** button.

16. Your login information should appear. Press **Connect** to authenticate to the VPN network.
17. After you are finish using the TTUHSC VPN, make sure to disconnect from it. To disconnect, click on the **Network** button in the notification area (lower right corner) to access the network side bar.
Next, the network side bar will appear. Click on TTUHSC VPN. A Disconnect button will appear; click on it.
