**Scope and Distribution:**

This protocol applies to all Texas Tech Physicians of El Paso ambulatory clinics.

**Procedure:**

A- Plan visit 20 days after COVID symptom onset or diagnosis if feasible

B- Screening at front desk

To be seen in regular clinics with common precautions (surgical masks) IF:

- **Patients Symptomatic at diagnosis:**
  - > 1 days after fever resolution AND
  - improvement in respiratory symptoms (e.g., cough, shortness of breath); AND,
  - > 10 days have passed since symptoms first appeared (20 days if hospitalized or immunosuppressed*)

- **Patients Asymptomatic at diagnosis and thereafter:**
  - 10 days since the date of their first positive COVID-19 diagnostic test and still asymptomatic (20 days if immunosuppressed*)

All others to be seen under full precautions (contact and airborne), or reschedule according to each clinic's process.

*Immunosuppression: chemotherapy for cancer, untreated HIV infection with CD4 T lymphocyte count < 200, combined primary immunodeficiency disorder, and receipt of prednisone >20mg/day for more than 14 days.
