COVID-19 Overview

SARS-CoV-2 is the virus which causes the disease COVID-19. It is a new viral strain that leads to a respiratory illness characterized by fever, cough, and shortness of breath. The World Health Organization (WHO) declared COVID-19 a pandemic on March 11, 2020.

HOW MANY PEOPLE HAVE IT?

Confirmed Cases
Globally: Over 25 million
USA: Over 6 million
Texas: Over 617,000
El Paso: Over 20,000

REPORTED NUMBERS FROM SEPTEMBER 1, 2020

HOW DOES IT SPREAD?

SARS-CoV-2 spreads mainly through close contact from person to person. The virus can be transmitted from respiratory droplets when a person sneezes, coughs, or speaks. It can also spread if a person touches a surface with the virus and then touches their eyes, nose, or mouth.

WHAT HAPPENS IF YOU ARE INFECTED?

Symptoms usually appear 2-14 days after being exposed to the virus. Common symptoms are fever, cough, and shortness of breath but not limited to nasal congestion, fatigue, loss of taste and smell, and sore throat. Please notify your health provider if you have any symptoms or questions.

For a more comprehensive list of symptoms, please visit https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html

- Travelled internationally
- Develop symptoms of COVID-19

Visit [http://epstrong.org/testing.php](http://epstrong.org/testing.php) for testing sites in El Paso, TX

**HOW DO I PROTECT MYSELF FROM SARS-CoV-2?**

- No Handshakes or Hugs
- Keep Your Distance (6ft)
- Wear Masks
- Avoid Crowds
- Wash Your Hands
- Stay At Home

**Social Distancing**

Maintain a 6 feet distance between yourself and others

**Wash Hands**

For at least 20 seconds frequently and consistently

**Wear Masks**

To protect yourself and others

**TREATMENT**

There is no specific antiviral treatment recommended for COVID-19. Treatment for COVID-19 positive patients is supportive. No vaccine is available as of now, but research for its development is ongoing.

COVID-19 Overview

FREQUENTLY ASKED QUESTIONS (FAQS)

Does everyone get symptoms?
No. Currently, 80% of individuals are asymptomatic or have mild symptoms, 15% have a severe infection, and 5% have critical infections requiring ventilation.

Why must I wear a mask when I’m in public?
It is important that you wear a mask to protect not only yourself, but also others. 80% of individuals have mild symptoms or are asymptomatic. Thus, some individuals may be infected with the virus and can unknowingly transmit the virus unto others. Wearing masks will help reduce the spread of your own respiratory droplets and protect you from another’s respiratory droplets.

Where can I get COVID-19 testing in El Paso, TX?

- **Clint ISD Testing**
  Call (915) 926-4070 from 8-4pm to make an appointment
