How to Get There
To access ClinicalKey from the library website, find the tabs in the middle of the screen, and select the one labeled “Databases.” From there, click on the “Evidence-Based” icon. This will take you to a list of the library’s databases that provide evidence-based information. ClinicalKey will be one of the options in that list.

Navigating ClinicalKey

Search Results and First Consult
When you search for a topic in ClinicalKey, the database provides a list of materials from different sources. Using the filter bar on the left side of the page, you can choose to limit to only those results that are journal articles, book excerpts, drug monographs, or those results that come from First Consult.

First Consult is ClinicalKey’s evidence-based point-of-care resource, replacing MD Consult. The information found here is gathered from sources such as the Cochrane Collaboration, the U.S. National Guideline Clearinghouse, and other reputable institutions.
