HSCEP OP: 72.17, Purchasing of Pharmaceuticals

PURPOSE: The purpose of this Texas Tech University Health Sciences Center El Paso (TTUHSC El Paso) Operating Policy and Procedure (HSCEP OP) is to outline procedures to be followed in purchasing of pharmaceuticals for entities of TTUHSC El Paso, to provide for the overall least costly purchasing strategies, and to ensure appropriate control of the pharmaceutical products administered and dispensed to TTUHSC El Paso patients.

REVIEW: This HSCEP OP will be reviewed June 15 of every odd-numbered year by the managing director of Purchasing, with recommendation for revisions submitted to the chief financial officer, or his/her designee, by July 1.

POLICY/PROCEDURE:

I. TTUHSC El Paso entities shall purchase pharmaceuticals through the HSCEP-contracted pharmaceutical wholesaler or a pharmacy designated or approved by the TTUHSC El Paso Purchasing Office.

II. Purchases of pharmaceuticals from other than the HSCEP-contracted pharmaceutical wholesalers or designated pharmacies shall be routed through the Pharmaceutical Purchasing Program Office for prior review and approval. To qualify for approval, such purchases shall be limited to only those pharmaceuticals which:

A. Are approved by the US Food and Drug Administration (FDA) for sale and use within the United States;

B. Are herbal supplements, nutraceuticals or other chemical substances for human use, which are not under the jurisdiction of the FDA for testing or manufacturing, and are used or administered for therapeutic purposes;

C. Are not available from the contracted pharmaceutical wholesaler or designated pharmacy;

D. Will result in a documented overall cost savings of greater than 10% (including all shipping and handling costs); or

E. Will result in an item acquisition cost (including all shipping and handling costs) above the Medicare, Medicaid or other third-party insurance reimbursement.

III. Pharmaceuticals which are required for unforeseen and immediate-need patient care purposes, with an insufficient time to procure them through the procedures outlined in paragraph 2 above, may be procured locally on an emergency basis, but shall be in only the quantity necessary to meet that particular patient care requirement.

Pharmaceuticals shall not be purchased under an individual TTUHSC El Paso practitioner’s DEA and/or medical license. Exceptions to this policy shall be considered in situations such as: proper Class of Trade rostering with the vendor/distributor, purchase restrictions by the manufacturer that restrict retail pharmacy, or a TTUHSC El Paso entity that must meet the vendor’s
requirements for Federal or State agency program participation. Each such situation shall be reviewed and referred to the dean of the applicable TTUHSC El Paso school for consideration or approval on an individual basis.

IV. Purchases of controlled substances shall be in accordance with HSCEP OP 52.17 (Controlled Substances Policy), and HSCEP OP 73.04 (Research Involving Controlled Substances and Laboratory Apparatus), as well as any other related campus, school or departmental policies.

V. Individual practitioners, or group of TTUHSC El Paso practitioners, shall not submit for purchase of pharmaceuticals in order to receive special credit, remuneration or recognition from the vendor.

VI. Special pricing offered to individual practitioners, or groups of practitioners, shall be forwarded to the TTUHSC El Paso Office of Pharmaceutical Purchasing for confirmation, coordination and facilitation of this pricing offer, and to request the pharmaceutical manufacturer representative make this pricing available to all eligible TTUHSC El Paso entity practitioners.

VII. This policy applies to institutionally purchased pharmaceuticals and does not apply to sample drugs provided to clinics or investigational drugs that are provided without charge to a practitioner pursuant to an Office of Sponsored Programs approved grant/contract with an IRB approved protocol.
