Policy Statement:

1. To ensure that the Paul L. Foster School of Medicine (PLFSOM) Credentialing Office verifies if a practitioner is excluded from participation in Medicare, Medicaid or other Federal health care programs by the Office of Inspector General or other Federal agency prior to granting membership to the PLFSOM Professional Staff and/or clinical privileges.

   PLFSOM is the recipient of reimbursement from several Federal health care programs (Medicare, Medicaid, etc.)

   The Federal government has the right to exclude from participation any individual or entity that has been convicted of Medicare and Medicaid program-related crimes, patient abuse crimes, health care fraud felonies or controlled substance felonies. The result of the exclusion is that any healthcare provider who receives reimbursement from a Federal health care program should not employ or contract with the excluded party.

2. It is the goal and responsibilities of the Credentialing Office to verify provider non-participation Medicare opt out in the Federal Medicare Programs when performing credentialing services on behalf of Medicare Advantage Organizations.

   In accordance with Chapter 6 of the Medicare Managed Care Manual, section 60.2, “no physician or other practitioner that has opted out of the Medicare program may accept Federal reimbursement for a period of two years”.

   It is the policy of the Texas Tech University Health Sciences Center El Paso (TTUHSC EP) (PLFSOM) that employed providers (Providers) may not opt out of any third party or managed care plan with which TTUHSC EP has signed an agreement.
Initial Appointment and Re-Appointment Process:

1. The Credentialing Office will verify the following databases during the initial credentialing and re-credentialing process to ensure that practitioners excluded from participation in any Federal health care programs by the Office of Inspector General or other Federal agencies (Medicare, Medicaid, etc.) are not granted clinical privileges. The individual querying the data banks will note if the practitioner’s name is listed/not listed in the databank. A printed query result, dated and initialed by the individual who completed the query, will be filed in the applicant’s credentials file.
