TTUHSC IT Mac OS X Snow Leopard VPN Connection Instructions

1. Click the Apple logo icon in the top left of your menu bar and select System Preferences from the drop-down.

2. The System Preferences window will open. Under Internet & Wireless click the Network icon.
3. On the left, you will see all available network connections. Click on the + icon to add a connection.

4. A new window will open up, for the **Interface** choose **VPN** from the drop-down.

5. For **VPN Type**: choose **L2TP over IPSec**, and for **Service Name**: enter **TTUHSC VPN**, then click **Create**.
6. The TTUHSC VPN connection will now be listed in the left-hand column, next to **Server Address**: type `svpn.ttuhsc.edu` and next to **Account Name**: enter your eRaider username. Then click on **Authentication Settings**.

7. Then under **User Authentication**: with **Password** selected type your eRaider password. Under **Machine Authentication**: with **Shared Secret** selected type `ttuhsc` then click **OK**.
8. Select the checkbox for **Show VPN status in menu bar** and then click **Advanced**.

9. Go to the Options tab and make sure “Send all traffic over VPN connection” is checked.
10. Select the **DNS** tab and then under **Search Domains** click on the + icon to add an entry. Type in *ttuhsc.edu* and then click **OK**.

11. Click on **Apply** to complete the setup.
12. **To connect:** On the top right of the menu bar there is a VPN icon that when you click on, will give you an option to connect to **TTUHSC VPN**.

13. **To disconnect:** On the top right of the menu bar there is a VPN icon that when you click on, will give you an option to disconnect from **TTUHSC VPN**.
