Fetal Heart Rate Monitoring:
A Fascinating but Imperfect Technology

Presented by:

John Christopher Glantz, M.D., M.P.H.
Professor of OB-GYN and Public Health Sciences
University of Rochester School of Medicine
Rochester, New York

Upon completion of this session, the participant should be able to:

• Summarize the history of fetal monitoring, the premise behind its development and its impact on pregnancy outcomes.
• Describe the characteristics of normal and abnormal fetal heart rate patterns.
• Discuss the proposed physiology of the various types of fetal heart rate decelerations and the concerns that have been raised about the accuracy of these proposed mechanisms.

Accreditation: The Texas Tech University Health Sciences Center El Paso Paul L. Foster School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation: The Texas Tech University Health Sciences Center El Paso Paul L. Foster School of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

It is the policy and practice of the Texas Tech University Health Sciences Center El Paso Paul L. Foster School of Medicine Office of Continuing Medical Education (CME) to resolve all potential conflicts of interest prior to the activity.

Disclosure: All planning committee members and speakers have disclosed that they or their spouses have no relevant financial relationships with any companies or organizations whose products or services may be discussed.

❖ The Office of CME reserves the right to cancel this activity in the event of unforeseen or extenuating circumstances.
