Objectives: Upon completion of this session, participants should be able to:

- Examine the relationships between the school/university and the community.
- Develop collaborative strategies to involve community members to shape the campus culture in responding to diverse community interests and needs, and to mobilize community resources for success of all learners.
- Summarize the main factors for teaching the concept of social justice in the SCI pre- clerkship curriculum (e.g., SCI, college mentor courses) (Examples: investigate learner’s own health and wellness through a social justice perspective; present the history of American health care and health insurance systems.)
- Propose the examples of social determinants of health from the perspective of a Hispanic population on the U.S.-Mexico border.
