The Southwest Center for Pediatric Environmental Health (SWCPEH) and the Texas Tech University Health Sciences Center El Paso (TTUHSC El Paso) Department of Emergency Medicine are deploying a Project ECHO® telehealth model to create a community collaboration effort focused on promoting awareness about COVID-19 and exposure risks from cleaning, disinfecting, and sanitizing agents.

**Our goal is to protect children in the home from chemical exposure deriving from household cleaning products while effectively protecting against the spread of the COVID-19 virus.**

**What is Project ECHO®?**

Project ECHO® (Extension for Community Healthcare Outcomes) is a free, innovative telehealth/education outreach model that connects community providers and leaders to a multidisciplinary team of specialists in pediatric health and toxicology.

**This ECHO is tailored to those working in community health**, such as promotores de salud, community health workers, health education specialists, and public health educators. However, all are welcome to attend.

The six-session ECHO® virtual tele-education modules will take place biweekly, Wednesdays at 12:00 P.M. Mountain Standard Time, July 7 – Sept. 22, 2021.

### REVISED Session Schedule — Please register to join
